Many great investigative films get banned from the mainstream media and video sharing websites simply because they have an element of nudity. Even if they are allowed on YouTube, they get banned by social networking websites and thus no one ever gets to see these great documentaries. We pride ourselves on bringing you the bravest, most cutting edge documentaries, art films and movies out there. Our new **Enigma X** sister network searches and indexes all documentaries regardless of whether they contain nudity or bad language. **Enigma X** is a new sister network designed for mature, educated people who don't want to be molly-coddled by the mainstream censored output of traditional television.

PSYCHIC EGYPT

We have been filming in EGYPT with 2K Ultra Definition cameras. We have had access to several areas which are usually closed off to the public. With this kind of picture quality, nuances which could easily be overlooked come through. This carving particularly shows the way that the SNAKE is somehow interconnected with the LIFE-FORCE ENERGY which animates the human body. When the person is decapitated, the energy is released.
